

MXU / METER DAMAGE POLICY

Effective 8/15/17

Our system reads your meter by radio frequency. A device called the “MXU” sits on top of your meter box/lid. It is very important that this equipment not be destroyed.

Please be cautious around this equipment with lawnmowers, weed eaters, vehicles, etc. Should this equipment be damaged (due to customer negligence), it may result in a charge to your account for such repairs. (Current cost plus labor).
