

Public Service Announcement

Holley Navarre Water System would like to ask the community to be on the look out for septic tank trucks that are illegally dumping septic sewage into the collection system. If you notice any septic tank trucks dumping their load into a liftstation, manhole, or sewer lateral, you are asked to take a photograph (if possible) and report this to the main office as soon as possible. HNWS is willing to pay \$500.00 to anyone that captures a photo of a septic tank truck disposing of their load into our collection system. The photo must clearly show the driver in the act of dumping and also include the company name on the truck.
